

PhosGard[®] APP-311

PhosGard[®] APP-311 is a fully formulated intumescent blend based on fine particle crystal phase II modified Ammonium Polyphosphate.

CAS Reg. Number: [Proprietary]

	Typical Properties
Appearance	Fine White Powder
Phosphorus	18 to 21%
Nitrogen	21 to 23%
Solubility in Water @25°C (g/100 ml)	≤ 0.50%
Moisture	≤ 0.20%
Specific Gravity	1.72
PH Value	8 to 9
Particle Size, D50	10 to 12 Microns

Applications

PhosGard[®] APP-311 is an effective non-halogenated flame retardant for thermosets, coatings and polyolefins.

Packaging

Standard packages include 20 kg bags and 900 kg super sacks.

Health and Safety

The use of proper protective equipment is recommended. Excess exposure to the product should be avoided. Please wash thoroughly after handling. Store the product in a cool, dry, well-ventilated area, away from incompatible materials. For additional handling and toxicological information, consult the St. Louis Group Material Safety Data Sheet.

This information is believed to be an accurate and reliable representation of the products average properties and it is offered in good faith, but without guarantee and may be modified by later findings. This document does not constitute a specification. The manufacturer makes no warranties, express or implied, regarding the accuracy, completeness, or adequacy of the information contained herein. Any recommendations or suggestions are also made without warranty or guarantee, since the conditions of use are beyond our control. It is the obligation of the customer/user to make its own assessment to determine suitability of use for any purpose, including, the appropriate health, safety, disposal, and environmental precautions necessary in each products intended use(s).
