

## PhosGard<sup>®</sup> TCP

### Tricresyl Phosphate

PhosGard<sup>®</sup> TCP is a highly active phosphate flame retardant.

CAS Reg. Number: [1330-78-5]

#### Typical Properties

Appearance	Transparent Yellow Liquid
Phosphorus (Theoretical)	8.4%
Phenol Content	≤ 0.10%
Moisture	≤ 0.10%
Color (APHA)	≤ 80
Viscosity (25°C, mPa.s)	56 to 62
Specific Gravity	1.16 to 1.18

#### Applications

PhosGard<sup>®</sup> TCP is an efficient low viscosity phosphate flame retardant/plasticizer, especially suited for PVC, PE, PU coatings and foams. It is also recommended for use in synthetic rubber, butylated rubber, and chloroprene rubber. It has excellent hydrolytic stability, electric insulation performance, and superior mildew & abrasion resistance.

#### Packaging

Standard package is a 230 kg drum.

#### Health and Safety

The use of proper protective equipment is recommended. Excess exposure to the product should be avoided. Please wash thoroughly after handling. Store the product in a cool, dry, well-ventilated area, away from incompatible materials. For additional handling and toxicological information, consult the St. Louis Group Material Safety Data Sheet.

This information is believed to be an accurate and reliable representation of the products average properties and it is offered in good faith, but without guarantee and may be modified by later findings. This document does not constitute a specification. The manufacturer makes no warranties, express or implied, regarding the accuracy, completeness, or adequacy of the information contained herein. Any recommendations or suggestions are also made without warranty or guarantee, since the conditions of use are beyond our control. It is the obligation of the customer/user to make its own assessment to determine suitability of use for any purpose, including, the appropriate health, safety, disposal, and environmental precautions necessary in each products intended use(s).
