

PhosGard[®] CT

Methyl (5-methyl-2-methyl-1,3,2-dioxaphosphorinan-5-y) ester, P, P-dioxide;
Methyl (5-methyl-2-methyl-1,3,2-dioxaphosphorinan-5-yl) methyl, methyl ester, P-oxide

PhosGard[®] CT is a highly active phosphonate flame retardant.

CAS Reg. Number: [42595-45-9; 41203-81-0]

	Typical Properties
Appearance	Colorless to Amber Liquid
Active Component	≥ 93%
Phosphorus Content	≥ 19%
Specific Gravity	1.20 to 1.30
PH Value	2.0 to 3.0
Acid Value (mg KOH/g)	≤ 20

Applications

PhosGard CT[®] is an efficient cyclic phosphonate flame retardant especially suited for the treatment of textiles. It has high phosphorus content and is compatible with many fabric types, especially polyesters. It also finds use as an efficient non-halogen flame retardant for flexible and rigid PU foam.

Packaging

Standard packages include 250 kg drums and 1,250 kg IBCs.

Health and Safety

The use of proper protective equipment is recommended. Excess exposure to the product should be avoided. Please wash thoroughly after handling. Store the product in a cool, dry, well-ventilated area, away from incompatible materials. For additional handling and toxicological information, consult the St. Louis Group Material Safety Data Sheet.

This information is believed to be an accurate and reliable representation of the products average properties and it is offered in good faith, but without guarantee and may be modified by later findings. This document does not constitute a specification. The manufacturer makes no warranties, express or implied, regarding the accuracy, completeness, or adequacy of the information contained herein. Any recommendations or suggestions are also made without warranty or guarantee, since the conditions of use are beyond our control. It is the obligation of the customer/user to make its own assessment to determine suitability of use for any purpose, including, the appropriate health, safety, disposal, and environmental precautions necessary in each products intended use(s).
