Unsuitable extinguishing media:
Do not use a solid water stream as it may scatter and spread fire.

Specific hazards during fire fighting:
Flash back possible over considerable distance.
Prevent buildup of vapors or gases to explosive concentrations.

Further information:
Flammable liquid and vapor.
Material will float and may ignite on surface of water.

Special protective equipment for fire-fighters:
Wear an approved positive pressure self-contained breathing apparatus in addition to standard fire fighting gear.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures:
Wear appropriate personal protective equipment.
Local authorities should be advised if significant spillages cannot be contained.

Environmental precautions:
Avoid release to the environment.

Methods and materials for containment and cleaning up:
Eliminate all ignition sources if safe to do so.
Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations (see section 13).
Prevent runoff from entering drains, sewers, or streams.

SECTION 7. HANDLING AND STORAGE

Advice on safe handling:
Wear suitable protective clothing.
Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
Ground and bond container and receiving equipment.
Use explosion-proof electrical equipment.
Use non-sparking tools.
Take precautionary measures against static discharges.
Do not breathe dust/ fume/ gas/ mist/ vapors/ spray.
Wash hands thoroughly after handling.
Use only in well-ventilated areas.

Conditions for safe storage:
Storage of solutions near 25°C will minimize haze and gel formation.
Solutions may become hazy, partially precipitate from solution, or gel with time on exposure to low temperature. with mild agitation will generally return the product to its original condition.
Store in a well-ventilated place. Keep container tightly closed.
Keep container tightly closed.
Store locked up.

Engineering measures: Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Personal protective equipment

Respiratory protection: If engineering controls do not maintain airborne concentrations below recommended exposure limits (where
applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.

Eye protection : Wear eye/face protection.
Wear safety glasses with side shields (or goggles).

Protective measures : Ensure that eye flushing systems and safety showers are located close to the working place.
