

# SAFETY DATA SHEET

## LOWILITE® 22 POWDER

Version	Revision Date:	SDS Number:	Country : US
1.4	2019/09/25	400000004866	Language: Z8

---

### SECTION 1. IDENTIFICATION

Other Identifiers : octabenzene

#### Recommended use of the chemical and restrictions on use

Recommended use : UV absorber  
Polymer stabilizer

Restrictions on use : Reserved for industrial and professional use.

#### Manufacturer or supplier's details

Company:	<u>Supplier</u> SI Group USA (USAA), LLC 4 Mountainview Terrace Suite 200 Danbury, CT United States of America (USA) 06810
----------	----------------------------------------------------------------------------------------------------------------------------------------------

#### Emergency telephone

Emergency telephone: +1 703-741-5970 (CHEMTREC/US)  
+44 (0) 1235 239 670 (NCEC/EU)  
0 512 8090 3042 (NRCC/CHINA)  
For additional emergency telephone numbers see section 16 of the Safety Data Sheet.

---

### SECTION 2. HAZARDS IDENTIFICATION

#### GHS classification in accordance with 29 CFR 1910.1200

Skin sensitization : Sub-category 1B

Combustible dust

#### GHS label elements

# SAFETY DATA SHEET

## LOWILITE® 22 POWDER

Version 1.4      Revision Date: 2019/09/25      SDS Number: 400000004866      Country : US  
Language: Z8

Hazard pictograms

:

Signal Word

: Warning

Hazard Statements

: H317 May cause an allergic skin reaction.  
May form combustible dust concentrations in air.

Precautionary Statements

: **Prevention:**  
P261 Avoid breathing dust/ fume/ gas/ mist/ vapors/ spray.  
P272 Contaminated work clothing should not be allowed out of the workplace.  
P280 Wear protective gloves.  
**Response:**  
P302 + P352 IF ON SKIN: Wash with plenty of soap and water.  
P333 + P313 If skin irritation or rash occurs: Get medical advice/ attention.  
P363 Wash contaminated clothing before reuse.  
**Disposal:**  
P501 Dispose of contents/ container to an approved waste disposal plant.

**Other hazards**

### SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance / Mixture : Pure substance  
Substance name : octabenzene  
Chemical nature : Polymer stabilizer

#### Hazardous ingredients

Chemical name	CAS-No.	Concentration (% w/w)
octabenzene	1843-05-6	>= 90 - <= 100

The exact percentage concentrations of components are being withheld as a trade secret in accordance with paragraph (i) of §1910.120

### SECTION 4. FIRST AID MEASURES

General advice : Move out of dangerous area.  
Consult a physician.  
Show this material safety data sheet to the doctor in attendance.

- |                                                             |                                                                                                                                                                                                   |
|-------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| If inhaled                                                  | : Move to fresh air in case of accidental inhalation of dust or fumes from overheating or combustion.<br>If symptoms persist, call a physician.                                                   |
| In case of skin contact                                     | : Take off contaminated clothing and shoes immediately.<br>Wash off with soap and plenty of water.<br>If symptoms persist, call a physician.                                                      |
| In case of eye contact                                      | : Flush eyes with water as a precaution.<br>Remove contact lenses.<br>Protect unharmed eye.<br>Keep eye wide open while rinsing.<br>If eye irritation persists, consult a specialist.             |
| If swallowed                                                | : Clean mouth with water and drink afterwards plenty of water.<br>Do not give milk or alcoholic beverages.<br>Never give anything by mouth to an unconscious person.<br>Obtain medical attention. |
| Most important symptoms and effects, both acute and delayed | : Product dust may be irritating to eyes, skin and respiratory system.<br>sensitizing effects                                                                                                     |
| Notes to physician                                          | : The first aid procedure should be established in consultation with the doctor responsible for industrial medicine.                                                                              |
- 

### SECTION 5. FIRE-FIGHTING MEASURES

- |                                                |                                                                                                                                                                                                                                                                                                                                                                                                                        |
|------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Suitable extinguishing media                   | : Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.                                                                                                                                                                                                                                                                                                              |
| Specific hazards during fire fighting          | : Do not allow run-off from fire fighting to enter drains or water courses.<br>Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.<br><br>Burning produces obnoxious and toxic fumes.<br>Thermal decomposition can lead to release of irritating gases and vapors.<br>May form explosive dust-air mixture. |
| Hazardous combustion products                  | : No hazardous combustion products are known.                                                                                                                                                                                                                                                                                                                                                                          |
| Further information                            | : Standard procedure for chemical fires.                                                                                                                                                                                                                                                                                                                                                                               |
| Special protective equipment for fire-fighters | : In the event of fire, wear self-contained breathing apparatus.                                                                                                                                                                                                                                                                                                                                                       |

### SECTION 6. ACCIDENTAL RELEASE MEASURES

# SAFETY DATA SHEET

## LOWILITE® 22 POWDER

Version	Revision Date:	SDS Number:	Country : US
1.4	2019/09/25	400000004866	Language: Z8

- 
- |                                                                     |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------------------------------------------------------------|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Personal precautions, protective equipment and emergency procedures | : | Use personal protective equipment.<br>Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration.<br>Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).<br>Non-sparking tools should be used.<br>Use personal protective equipment.<br>Avoid dust formation.<br>Avoid breathing dust.<br>Ensure adequate ventilation. |
| Environmental precautions                                           | : | Try to prevent the material from entering drains or water courses.                                                                                                                                                                                                                                                                                                                                                                                                        |
| Methods and materials for containment and cleaning up               | : | Pick up and arrange disposal without creating dust.<br>Keep in suitable, closed containers for disposal.                                                                                                                                                                                                                                                                                                                                                                  |
- 

### SECTION 7. HANDLING AND STORAGE

- |                                                 |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Advice on protection against fire and explosion | : | Avoid dust formation. Provide appropriate exhaust ventilation at places where dust is formed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Advice on safe handling                         | : | Minimize dust generation and accumulation.<br>Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces.<br>Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations.<br>Keep away from heat and sources of ignition.<br><br>For personal protection see section 8.<br>Persons with a history of skin sensitization problems or asthma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used.<br>Smoking, eating and drinking should be prohibited in the application area. |
| Conditions for safe storage                     | : | Keep container tightly closed in a dry and well-ventilated place.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

### SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### Control parameters

#### Ingredients with workplace control parameters

# SAFETY DATA SHEET

## LOWILITE® 22 POWDER

Version	Revision Date:	SDS Number:	Country : US
1.4	2019/09/25	400000004866	Language: Z8

Contains no substances with occupational exposure limit values.

### Exposure controls

**Engineering measures** : It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen deficient environment.

Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment). Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Ensure adequate ventilation, especially in confined areas.

Dust formation may be relevant in the processing of this product. In addition to substance-specific OELs, general limitations of concentrations of particulates in the air at workplaces have to be considered in workplace risk assessment. Relevant limits include: OSHA PEL for Particulates Not Otherwise Regulated of 15 mg/m<sup>3</sup> - total dust, 5 mg/m<sup>3</sup> - respirable fraction; and ACGIH TWA for Particles (insoluble or poorly soluble) Not Otherwise Specified of 3 mg/m<sup>3</sup> - respirable particles, 10 mg/m<sup>3</sup> - inhalable particles.

Use with local exhaust ventilation.

### Personal protective equipment

**Respiratory protection** : In the case of dust or aerosol formation use respirator with an approved filter.

Use respiratory protection unless adequate local exhaust ventilation is provided or exposure assessment demonstrates that exposures are within recommended exposure guidelines.

**Hand protection**

**Remarks** : Polyvinyl alcohol or nitrile- butyl-rubber gloves Before removing gloves clean them with soap and water.

**Eye protection** : Eye wash bottle with pure water  
Tightly fitting safety goggles

**Skin and body protection** : Dust impervious protective suit  
Choose body protection according to the amount and

### SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance	: powder
Color	: yellow
Odor	: slight
Odor Threshold	: No data available
pH	: No data available
Melting point/range	: 47 - 50 °C
Boiling point/boiling range	: > 400 °C
Flash point	: 246 °C Method: closed cup
Evaporation rate	: No data available
Flammability (solid, gas)	: No data available
Upper explosion limit	: No data available
Lower explosion limit	: No data available
Vapor pressure	: < 0.133 hPa (20 °C)
Relative vapor density	: No data available
Relative density	: 1.16
Density	: 1.16 g/cm3
Solubility(ies)	
Water solubility	: < 0.0001 g/l (20 °C)
Solubility in other solvents	: No data available

---

Partition coefficient: n-octanol/water	:	log Pow: > 6
Autoignition temperature	:	370 °C
Decomposition temperature	:	> 350 °C
Viscosity		
Viscosity, dynamic	:	No data available
Viscosity, kinematic	:	No data available
Explosive properties	:	No data available
Oxidizing properties	:	No data available
Surface tension	:	No data available
Dust explosion class	:	see user defined free text

---

### SECTION 10. STABILITY AND REACTIVITY

Reactivity	:	Stable under recommended storage conditions.
Chemical stability	:	No decomposition if stored and applied as directed.
Possibility of hazardous reactions	:	Stable under recommended storage conditions. No decomposition if used as directed.
Conditions to avoid	:	No data available
Incompatible materials	:	Oxidizing agents, Strong acids and strong bases
Hazardous decomposition products	:	Carbon oxides

---

### SECTION 11. TOXICOLOGICAL INFORMATION

#### Information on likely routes of exposure

Skin contact

#### Acute toxicity

#### Components:

#### octabenzene:

Acute oral toxicity	:	LD50 (Rat): > 5,000 mg/kg
Acute dermal toxicity	:	LD50 (Rabbit):> 10,000 mg/kg

### Skin corrosion/irritation

#### Product:

Remarks: The product is not considered as being a skin irritant.

#### Components:

##### octabenzene:

Species: Rabbit

Result: No skin irritation

### Serious eye damage/eye irritation

#### Product:

Remarks: The product is not considered as being an eye irritant.

#### Components:

##### octabenzene:

Species: Rabbit

Result: No eye irritation

### Respiratory or skin sensitization

#### Product:

Remarks: Causes sensitization.

#### Components:

##### octabenzene:

Species: Guinea pig

Assessment: May cause sensitization by skin contact.

Method: OECD Test Guideline 406

GLP: yes

### Germ cell mutagenicity

#### Components:

##### octabenzene:

Genotoxicity in vitro	:	Test Type: Ames test
		Metabolic activation: with and without metabolic activation
		Result: negative
		GLP: no

Germ cell mutagenicity - Assessment	:	In vitro tests did not show mutagenic effects

#### Clean Air Act

# SAFETY DATA SHEET

## LOWILITE® 22 POWDER

Version	Revision Date:	SDS Number:	Country : US
1.4	2019/09/25	400000004866	Language: Z8

This product neither contains, nor was manufactured with a Class I or Class II ODS as defined by the U.S. Clean Air Act Section 602 (40 CFR 82, Subpt. A, App.A + B).

This product does not contain any hazardous air pollutants (HAP), as defined by the U.S. Clean Air Act Section 112 (40 CFR 61).

This product does not contain any chemicals listed under the U.S. Clean Air Act Section 112(r) for Accidental Release Prevention (40 CFR 68.130, Subpart F).

This product does not contain any chemicals listed under the U.S. Clean Air Act Section 111 SOCMII Intermediate or Final VOC's (40 CFR 60.489).

### Clean Water Act

This product does not contain any Hazardous Substances listed under the U.S. CleanWater Act, Section 311, Table 116.4A.

This product does not contain any Hazardous Chemicals listed under the U.S. CleanWater Act, Section 311, Table 117.3.

This product does not contain any toxic pollutants listed under the U.S. Clean Water Act Section 307

### US State Regulations

#### Massachusetts Right To Know

No components are subject to the Massachusetts Right to Know Act.

#### Pennsylvania Right To Know

octabenzene	1843-05-6
Not listed	

#### New Jersey Right To Know

octabenzene	1843-05-6
