HiTEC® 3315

Extreme Pressure Additive

For Use in EP and Load-carrying Applications

HiTEC® 3315 Extreme Pressure Additive

For Use in EP and Load-carrying Applications

Application

HiTEC® 3315 extreme pressure (EP) additive contains a high percentage of sulfur providing controlled activity. It is used in applications where EP and load-carrying capabilities are required.

Key Performance Benefits

- Ashless
- Good EP and load-carrying properties
- Low reactivity to copper containing alloys (especially when used in combination with corrosion inhibitor HiTEC® 4313)
- High sulfur content
- Excellent booster for FZG, 4-ball weld, CRC L-42, and other EP tests

Recommended Dosage

HiTEC® 3315 is recommended at a range of dosages depending on the application and desired performance. Please contact your Afton Chemical Representative for specific recommendations.

Typical Characteristics

Appearance	Red to amber liquid
Density, lbs/gal.	8.63
Specific Gravity @ 15.6°C	1.0281
Viscosity @ 40°C, cSt	3.5
Flash Point, °C (PMCC)	76 min.

Handling Information

Max Handling Temp: 80°C
Shelf Life: 24 months @ ambient (10–40°C)
